

A/V Control System Instructions

ON/OFF:

- A short press will turn on the projection & audio systems.
- Hold for 5 seconds to turn off the audio & projection systems, and/or the audio only mode.

AUDIO MODE:

- Press to turn on the audio only mode. This will enable audio to the speakers without turning on projection.

HELP:

- Press once to page the Help Desk. A tech will be alerted of your need for assistance.
- Press again to cancel help request.

MUTE:

- Press to mute audio.
- Press again to unmute.

VOL ▲:

- Press to increase audio volume.

Please Note

You can turn on projection mode when currently in audio only mode, but you must turn the system off before returning to audio only mode.

Please Note

Turn off the system when you are finished using it. Failure to do so could cause the projector to become unresponsive.

PC:

- Press to select PC as the audio/video source.

VIDEO:

- Press to select composite video as the audio/video source.
- RCA input jacks can be found on the wall input plate.

VOL ▼:

- Press to decrease audio volume.

BLANK:

- Press to "black screen" the projection.
- Press again return to normal display.

AirPlay:

- Press to select AirPlay as the audio/video source.
- Send audio/video to the projector & speakers wirelessly from iOS devices (iPad, iPhone, etc.) or a laptop via iTunes.
- Be sure to connect to the AirPlay device that corresponds with your current room number.
